

Vespa PX with sidecar

Originally Published : [ScooterEngineering.com](#)

A new TV add was being made for a major supermarket and they needed a red Vespa and Side-Car built for them in 5 days. At SS Scooter we are not shy of a challenge, and both my side car and Vespa where stripped back to bear bones and immediately sent to paint and panel. With a bit of a financial incentive the spray painter returned the scooter and side-car back in record time.

We worked day and night to meticulously rebuild the Vespa and side-car. With the steering dampers mounted and side ?car perfectly aligned, the scooter and side-car now lusciously coated in their

new ??chilli red?? exterior, were ready to hit the roads.
