

## Classic Vespa VIN Decoder &#038; Model Identifier

Use the following table to get the built date and model number of you vintage Vespa scooters. You need to first locate the VIN on the frame of your scooter. It is most likely on the frame under the engine side cowl. Once you have the number - let's say that the VIN reads VLB1T109500 then you use thetable to see that a VLB1T is a 150 Sprint and the numbers tell that is is built in 1970.
